The HASCO **HAD-BNCJ-TNCP** is a general purpose BNC Female to TNC Female between-series adapter from HASCO. This between-series coaxial adapter will operate up to 4 GHz.

Adapters that have a male to female or plug to jack configuration are known as "connector savers." Typically, a low loss or low VSWR adapter is placed on more expensive component connectors to prevent damage.

The HAD-BNCJ-TNCP is RoHS compliant.

HASCO stocks an extensive selection of RF and Microwave between-series, in-series, right angle and low PIM adapters.
