## Part No: **HA18A5W-09**

The HASCO **HA18A5W-09** is an RF attenuator that operates from DC to 18 GHz and handles up to 5 Watts (CW). This attenuator is constructed with SMA Male to SMA Female connectors.

The HA18A5W-09 is RoHS Compliant.

An attenuator is an electronic device that reduces the power of a signal without appreciably distorting its waveform. Attenuators are a useful building block within RF design where they reduce the signal level while providing an accurate match for the characteristic impedance used. HASCO offers a huge selection of RF and microwave attenuators and can support most requirements, such as SMA, 2.92mm, 2.4mm, 1.85mm, Type N and TNC in addition to many other RF and Microwave coaxial attenuators.

*9 dB - Fixed Attenuator SMA Male To SMA Female Up To 18 GHz Rated To 5 Watts With Black Aluminum Heat Sink Body*
