Part No:

## HA6A2-05

The HASCO HA6A2-05 is an RF attenuator that operates from DC to 6 GHz and handles up to 2 Watts (CW). This attenuator is constructed with SMA Male to SMA Female connectors. The HA6A2-05 Attenuator offers 1.20:1 max VSWR.

The HA6A2-05 Attenuator is RoHS Compliant.

An attenuator is an electronic device that reduces the power of a signal without appreciably distorting its waveform. Attenuators are a useful building block within RF design where they reduce the signal level while providing an accurate match for the characteristic impedance used. HASCO offers a huge selection of RF and microwave attenuators and can support most requirements, such as SMA, 2.92mm, 2.4mm, 1.85mm, Type N and TNC in addition to many other RF and Microwave coaxial attenuators.
