## HLL228R-24P-24P-48

The HASCO **HLL228R Series Cable** is a low loss LL228 cable that operates from DC to 50 GHz. This cable series is constructed with 2.4mm Male to 2.4mm Male connectors. These cables are internally ruggedized with multi-layer copper spiral and braided armor. They offer excellent phase and amplitude stability vs. flexure. The HLL228R Series cables offer 1.35:1 max VSWR.

The HLL228R-24P-24P-48 is RoHS Compliant.

HASCO offers many types and configurations of RF and microwave cable assemblies and can support most requirements, such as flexible, conformable, semi-rigid, VGA, low-loss, phase stable, armored, jacketed and more; all assembled with the highest quality RF connectors.
