HT35F-35

The HASCO **HT35F-35** is an RF termination (also called RF load or dummy load) that operates from DC to 34.5 GHz and handles up to 1 Watt (CW). Our 3.5mm termination/load has a Female gender. **HT35F-35** termination offers 1.15:1 max VSWR DC-35GHz.

The **HT35F-35** is RoHS Compliant.

RF load/terminations are indispensable components in many RF, microwave and millimeter wave systems where signal reflection from unused ports can potentially damage the device or reduce the signal integrity. By using a termination on an unused port with a matched load (dummy load), the incident energy will be absorbed with minimal reflection. These termination components are commonly used to terminate devices such as couplers, circulators, and switches. They are also widely used in measurement systems to ensure accurate results. HASCO offers a huge selection of RF, microwave and millimeter wave terminations up to 65 GHz with excellent performance over the entire operating range and power handling capabilities up to 800 Watt (CW).

1 Watt RF Load Termination with 3.5mm Female Connector DC-35 GHz

Electrical

• Frequency Range DC - 34.5 GHz

• VSWR DC - 34.5 GHz 1.15:1

• Impedence 50Ω

• Power 1 Watt Average (-40°C to 70°C Linearly Derated to 0.7 Watt at 105°C)

• Insertion Loss $\leq 0.03 \text{ x} \sqrt{\text{f(GHz)}} \text{ dB}$

• Insulation Resistance ≥5000MΩ

• Dielectric Withstanding Voltage 1000V rms (sea level)

• Working Voltage 335V rms (sea level)

• RF Leakage ≥100dB to 1GHz

Environmental Data

• Temperature Range -55°C - +105°C

Material

Body
Passivated Stainless Steel

• Contact Pin Beryllium Copper

(Plating: Gold 4 Over Nickel-Phosphorus Alloy 80, Over Copper 20)

• Insulator PPO

• Cover Aluminium

• Dust Cap PVC
