

Export Controls

US Export Administration Regulations (EAR)

HASCO, Inc. adheres to the EAR and has established protocols to ensure our products are accurately classified with the appropriate export control classification numbers. Our systems and trained personnel ensure that all sales are thoroughly screened to prevent unauthorized shipments to restricted parties.

The majority of our products are classified as EAR99, but a few dual-use items can be found within our catalog and receive additional country screening based on the reasons for control associated with the final destination. For all International sales, HASCO, Inc. works with customers to obtain [end use details](#), which is kept as an official record for 10 years.

International Traffic in Arms Regulations (ITAR)

HASCO, Inc. complies to the ITAR and has policies and processes that align with enhanced ITAR controls and follow protocols necessary to protect controlled technical information in accordance with DFARS 252.204-7012 and the NIST SP 800-171 cyber security standard.

Should you wish to contact us regarding the design, test, or manufacturing capabilities for products offered by our suppliers, with regard to the scope of ITAR, please contact us at sales@hasco-inc.com.
